PREFACE

THE famous antiquary Sir Augustus Wollaston Franks, for nearly thirty years Keeper of British and Mediæval Antiquities in the British Museum, at his death in 1897 bequeathed to the Trustees, among many other treasures, a collection of English and foreign book plates which is probably the largest and most comprehensive ever formed. (The word English is here used, as the collector himself was accustomed to use it in conversation, for brevity and convenience to signify British and American as distinguished from Continental.) The English portion, after elimination of duplicates, numbers close upon forty thousand examples; the foreign portion nearly thirty thousand. When the collection came into the British Museum, the foreign portion alone was in something like order. It consisted chiefly of the Rozière and Bilco collections, purchased by Sir Wollaston Franks *en bloc*; and both these had been methodically arranged and mounted by their former owners. But Sir Wollaston amassed his English collection from all manner of miscellaneous sources, and continued actively increasing it till within a few months of his death; and in his hands the work of acquisition and identification had far outstripped that of sorting and arrangement. When his bequest became the property of the Trustees, this portion had yet to be weeded of duplicates, brought into one main series, studied, sorted, numbered, catalogued, and arranged for mounting, before it could be made available for the use of students. This task was entrusted to Mr. Gambier Howe, who has completed it after nearly five years' labour; so that before the close of the current year the entire Franks collection of English book plates will be mounted and accessible for study in the Print Room, in some sixty albums containing from six to seven hundred plates each; and the catalogue will within the same period be completed

and printed in three volumes, of which Vol. I. is herewith issued to the public.

Sir Wollaston Franks in the first instance took up the collecting of book plates as a sort of light supplement to his other and graver antiquarian labours. The pursuit had the further advantage that it was one relatively inexpensive compared with other kinds of collecting to which he was devoted. The very high prices commanded, for instance, by fine mediæval works of art and curiosity rendered it difficult for a collector of his comparatively moderate, although comfortable, means to compete for them in the open market on any but rare occasions. But of book plates, as his interest in them grew, he could look forward to forming a really comprehensive and all but complete collection; and from the side of heraldry, genealogy, and family history, on which subjects he was an authority of the first rank, the study very strongly appealed to him.

Other amateurs, as Dr. Joseph Jackson Howard, Maltravers Herald Extraordinary, the Hon. Gerald Ponsonby, and the Hon. Leicester Warren, afterwards Lord de Tabley, had begun collecting book plates in England earlier than Sir Wollaston. But when he had once taken up the pursuit, he carried it on with characteristic energy, and before the end had outstripped practically all competitors. The nucleus of his collection was a small volume which passed into his hands from those of his old friend Mr. C. V. Bailey, one of a coterie of collectors and amateurs in England which included such men as Mr. W. Twopeny, Mr. Albert Way, the Marchese d'Azeglio, John Henderson, and Felix Slade. His interest in heraldry and English history had made him pay a certain amount of attention to this volume from the first; but he seems never to have regarded it as having any special value until about the year 1878, when the Hon. Leicester Warren borrowed it for use in the compilation of his "Guide to the Study of Book Plates." This gentleman was a friend of old standing, with whom Sir Wollaston shared many tastes and pursuits. The fresh interest aroused on this occasion led Sir Wollaston to throw into this new study the same enthusiasm and concentration of purpose which made the secret of his success in other fields.

No one who has not collected book plates can realise how absorbing the work may become. The necessity for accurate cataloguing and indexing, no matter how unimportant the individual plate may be, the determination of the method of arrangement, which almost necessarily changes as the collection grows, the

far-reaching problems of genealogy and private history which open up on every side, the endless correspondence with other collectors and exchanges of plates with them, all these things imply no small expenditure of time and knowledge on the part even of an ordinary collector. With a man of Sir Wollaston's high reputation for knowledge and experience the conditions were far more exacting. He became a general referee on the subject, and his opinions on points of heraldic usage and family history were regarded as practically final. Experienced collectors and beginners alike formed the habit of appealing to him, and it was almost an unknown thing that he should decline to give the information sought. A natural effect of these cordial relations with other amateurs was eventually to enrich the collection which Sir Wollaston was himself in process of forming; all the more inasmuch as his intention of ultimately bequeathing it to the British Museum was well known. The first impulse of any friend giving up the pursuit was to offer his series to Sir Wollaston, whose collection was thus rapidly increased by the wholesale incorporation of others, as well as by purchases both large and small from every trade source available.

A word needs to be said as to a few of the most remarkable specimens in the collection. Sir Wollaston Franks was never able to secure an impression of the earliest book plate known to have been produced in England, viz., that engraved on wood in 1574 to be placed in the volumes presented to the University of Cambridge by Sir Nicholas Bacon. Accordingly the earliest specimen in this collection is that of Sir Thomas Tresame, which bears the date 1585. From that year downwards hardly any English plate of real importance is missing. The two large Dering plates, those done for Thomas Gore by Michael Burghers and William Faithorne, both the Marriott plates, and the whole series engraved for Samuel Pepys, will be found in their several places. Coming to the last years of the seventeenth and the earliest of the eighteenth century, there is one whole volume of quite unique value and interest, the existence of which was kept, during Sir Wollaston's lifetime, a profound secret from every one except two special friends and confidants. These were the late Lord de Tabley and Mr. Charles Hercules Read, so long his chief pupil and assistant, and now his successor at the head of his department in the British Museum. The volume, or album, in question was acquired in its original shape by Lord de Tabley from a bookseller at Brighton, whose impression was that he had obtained it from a Sussex gentleman and lady called

Borrer, and who mistook it for a mere collection of plates of arms cut from some old peerage. It contained in reality a series of 640 armorial engravings, of which 637 are unquestionably book plates, all of one period, most of them rare, some previously quite unknown. With two exceptions, Nos. 1 and 2, which are not book plates, and possibly a third—the plate of William Fitzgerald, Bishop of Clonfert, 1698—they are all either the work, as Sir Wollaston Franks thought, of one hand, or, as seems more probable from internal evidence, of several hands employed in one and the same workshop. The album had been in Sir Wollaston's keeping for a long while before it became his property on the death of its owner, Lord de Tabley, in 1895. Both collectors always referred to it by the name of its place of purchase, "Brighton"; and it is so labelled in the Museum collection. Its contents, although for the sake of reference they are catalogued in the following pages in one alphabet with the rest, have as a matter of practical arrangement not been incorporated with the main series, but kept apart. All that was done was to take them off the leaves of the old damaged album and to remount and rebind them in exactly the same order in a new and solid one; so that the student can still inspect them as a separate series in their original sequence and connection.

Sir Wollaston Franks inclined to the opinion that the engraver of this interesting series might be John Sturt, inasmuch as the plate of Prince William, No. 2 (which as already mentioned is not a book plate) is found in other impressions bearing his signature, though from this particular impression the signature has been erased. No. 1, the plate of the Amicable Society (which again is not a book plate) is also in the style of Sturt, and seems likely to be by his hand. Further, a later state of No. 544, with the arms of Lord Balmerino, occurs in the middle of a large document engraved in Anderson's "Selectus diplomatum et numismatum Scotiæ thesaurus," published in 1739, a work on which Sturt is known to have been engaged. Sir Wollaston notes as an additional piece of evidence that among the subscribers to Sturt's miniature Prayer-Book (engraved from 188 silver plates) were several members of the Sussex family of Borrer, from a later member of which the Brighton bookseller thought that he had acquired the volume.

Nevertheless the general style of the "Brighton" plates, including that of Lord Balmerino, is distinctly less delicate and artistic than that of Sturt in his known work, and does not seem to confirm Sir Wollaston's conjecture. It is suggested by

Mr. Gambier Howe that the workshop in which the series was produced may possibly have been that of John Senex, who had a bookseller's establishment at the "Globe," in Salisbury Court, Fleet Street. The number of plates of members of the Temple and Lincoln's Inn in "Brighton" seems to point to an engraver in that neighbourhood: and the signature of Senex is found on a very close copy of the plate of Anthony Hammond of Somersham, 1700 ("Brighton," No. 227) which is without other inscription and is probably a dedication plate. The plate of Major-General John Tidcomb occurs in "Brighton" without signature; on another impression in the main series is found a signature reading A. or perhaps J. A.; but this seems to be the only trace of an actual signature known to exist on any book plate belonging to the "Brighton" series.

Though every considerable collection contains a certain number of these same plates which are brought together in "Brighton," there are in this album many plates hitherto absolutely unknown to collectors, as well as known plates in early states not previously described. The series shows five or six distinct patterns of shields, helmets, and mantlings, which seem to have been kept in stock ready to be filled up with the arms and inscription as customers demanded them. In some instances, where no crest was required, the continuation of the mantling over the helmet has been added apparently by a different hand: this is very noticeable in the plates of The Right Hon. Sir Edward Ward, John Ward of Capesthorne, and The Right Hon. Sir Owen Buckingham. The earliest date on any plate in the volume is 1679, on the plate of Sir Robert Clayton. This was the year in which Clayton was Lord Mayor, but the plate itself was probably not engraved till nearly twenty years later. The next date is 1687, also occurring on the plate of a Lord Mayor, Sir John Shorter, and as Sir John died in September 1688, during his mayoralty, this may be taken as the actual date of the plate. In 1688 we have the plate of Sir Basil Firebrace, Knight, Alderman, and Sheriff of London; but this again may not be the real date, though the plate must have been engraved before July 28, 1698, when Sir Basil was created a Baronet. After this there is an interval of six years, when we get the plate of Fettiplace Nott, dated 1694. No plate is dated in the next three years; but from 1698 the series continues regularly till 1709. No later dated plate is in the volume, but plates evidently by the same hands occur in the general collection till 1720. It was the intention of Sir Wollaston Franks and Lord de Tabley to publish this volume

with facsimiles of the most important and interesting plates, but failing health, first in one case and then in the other, defeated this project.

Later than the "Brighton" series perhaps the most interesting plates of the eighteenth century are the four engraved by Hogarth, viz., Gamble; the two states of the plate of John Holland the Herald painter; George Lambart; and a plate engraved for some member of the Paulet or Powlett family. The impressions of the Gamble and Lambart plates are believed to be unique and to be the same from which Ireland made his well-known copies. Towards the end of the century there are among other treasures proofs before letters of the beautiful plates of William Ayton designed by Edwards and engraved by Hall, of Sir Foster Cunliffe engraved by Bartolozzi, and of the Stourhead Library engraved for Sir Richard Colt Hoare the historian of Wiltshire.

Among the many specimens of particular interest to American collectors may be mentioned the very rare plate of "His Excellency Joseph Dudley, Esq., Governor of New England 1702," that of "The Hon. Benedict Leonard Calvert, Esq., 2nd son to the Rt. Hon. Ben. Leo. Lord Baltemore, Absolute Lord and Proprietary of the Provinces of Maryland and Avalon in America," and the two plates of James Giles, of which the Chippendale engraved by R. Montgomery is extremely scarce, while his later plate, engraved by Maverick, is by no means common. It is to be regretted that only a reprint of George Washington's plate is here, but there are fine impressions of those of William and Thomas Penn.

Every collector has his own views on the subject of arrangement. In the case of small collections there is much to be said for a classification under styles, as Jacobean, Chippendale, Book-pile, Pictorial, the various varieties of Armorial, etc. But in dealing with a collection of this enormous bulk, it was felt that an alphabetical arrangement was the only practicable one, and would in the end prove most useful to the general public, as in this way all the plates of a particular family can be seen at a glance. A strict alphabetical system has accordingly been adopted in the printing of the following catalogue; the only deviation being that the plates of peers have in all cases been entered together at the heads of the families to which they severally belong. In the actual arrangement of the plates as mounted in the albums, a corresponding alphabetical system has also been observed, but with this difference, that the various

branches of a family have so far as possible been kept distinct, and the plates of each branch arranged chronologically. "Brighton," as has already been indicated, and as was the expressed wish of the collector, forms an exception. In addition to the main alphabetical series, to "Brighton," and to a small number of plates still preserved on the inside covers of the books to which they were originally affixed, the collection, as arranged in the Museum, will include a set of duplicate examples selected and arranged in a separate volume for the use of beginners and in illustration of the various styles. Plates of colleges, corporations, public institutions and libraries, will also have a volume to themselves; and so will the few examples too large for mounting in the ordinary albums.

From a genealogical and heraldic point of view it is difficult to over-estimate the value which the present collection possesses, not only for the enthusiast and specialist in book plates, but for students of family history in general. Hardly an English family of any importance in the seventeenth and eighteenth centuries is unrepresented. An impalement or quartering on a book plate often helps to solve a long-standing genealogical puzzle; and of the entries in the following catalogue no small proportion will be found to convey in brief the result of special and industrious new research on the part of its compiler.

Each volume of the catalogue will be illustrated with six facsimiles in photogravure from as many of the rarest of the plates comprised in it (the initials B. M. in small having been added to each facsimile to prevent the possibility of its being detached and put into the market as an original); while as a frontispiece to Vol. I. an impression of Sir Wollaston Franks' own plate, from the original copper, is prefixed by kind permission of the executor, Mr. C. H. Read. To that gentleman and to Mr. Gambier Howe I must express my indebtedness for much of the information contained in the above pages.

The following indications may be added for the help of persons making use of this catalogue. When the same quartering appears on more than one plate belonging to the same family, its name is only given once. Whenever it has been found possible to identify an anonymous plate, this has been inserted in its proper place and order; and a heraldic index of all such plates will be found at the end of Vol. III. When the date of a plate is given in the catalogue, it is copied from the plate itself, or in a few instances from the watermark on the paper: no merely conjectural or approximate date is given at all. Where

the name of the engraver appears on any plate, it is quoted in brackets at the end of the entry: and where an unsigned plate can on good grounds be attributed to a known engraver, his name is suggested with a note of interrogation. In each entry, the text in Roman characters is that which appears on the plate itself: the compiler's notes and observations are printed in italics. Signs preceding the numbers in the catalogue signify as follows:—

* Plates in "Brighton."
† Large plates in separate volume.
‡ Plates left in the original books.
